Cut costs on transport packaging

Save time and money with myPallet's
effortless management of your transport
packaging in REAL-TIME

Digital transport packaging management

Do you recognize these typical challenges with your transport packaging?

- » You spend a lot of money on transport packaging, and your company wants to cut down the costs...
- » You have less pallets or other types of transport packaging at the end of the year than at the beginning of the year...
- » You experience disagreements with suppliers, customers, and freight forwarders about transport packaging...
- » You spend too much time on manual administration and you still don't have an overview of your accounts and balances in real time...

These challenges have become even more critical with the rising prices of transport packaging in recent years.

In other words, there are many reasons to implement a digital solution right now. Fortunately, the solution is simple.

With our user-friendly and effective digital solution you can save money on administration while minimizing your loss of pallets or other types of transport packaging.

In this product presentation, we show you, how you achieve this with a real-time overview **of all transactions for incoming and outgoing transport packaging.**

Enjoy.

Meet a user-friendly system for managing your transport packaging

Do you lose too many pallets and other types of transport packaging – and **is it getting too expensive to replace this packaging in the long run?**

In the daily operation of a busy company, it is a heavy administrative burden to manage and keep track of all transport packaging.

That's why we have developed a solution that minimizes loss of transport packaging and the administrative burden.

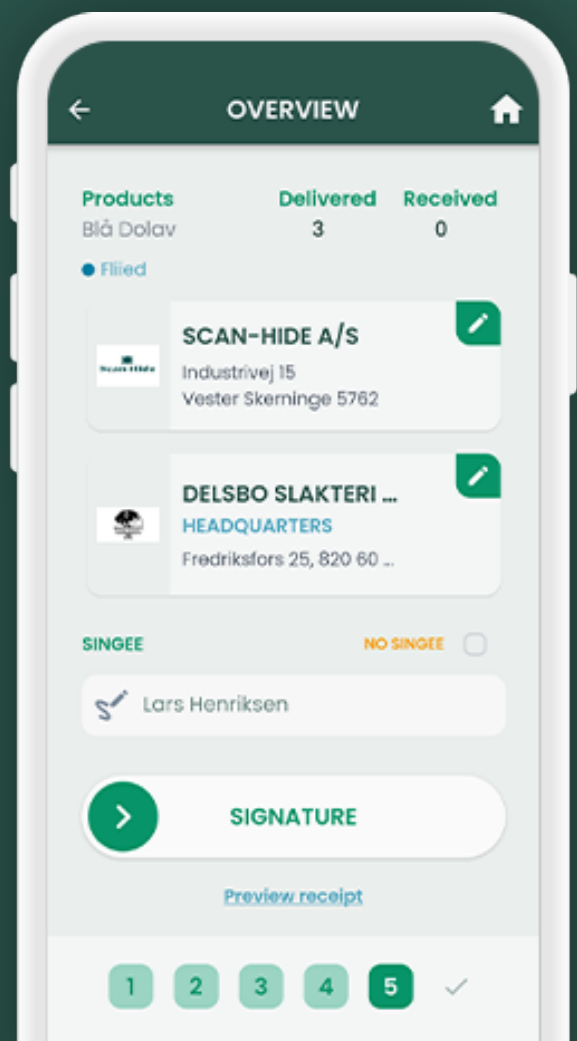

myPallet digital solutions make it easy to keep track of your incoming and outgoing transport packaging.

And of course, it's a key parameter for us to ensure the system is extremely easy to use for all employees, regardless of background and age groups.

"We have spent a lot of hours to administrate our pallet exchange! In a innovative company such as Posten/Bring we simply had to get this part digitized too. No more unreadable pallet receipts, a 100 percent digital solution for the benefit of both drivers and administration".

Stig H. Øybakken

Senior Advisor/Business Analyst, Bring

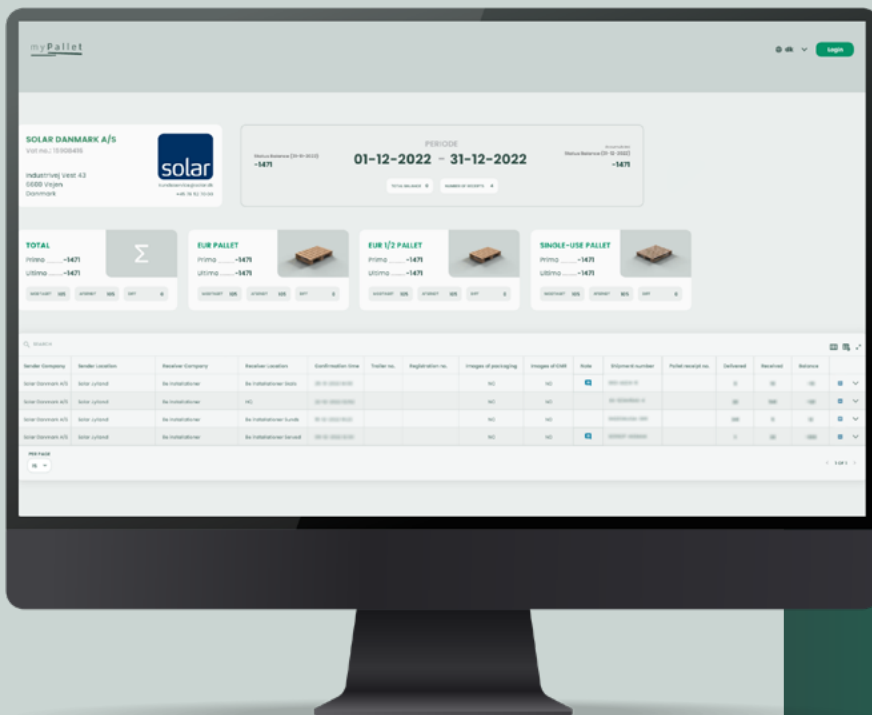

Make transactions in less than 10 seconds

With the myPallet app, we have made it easy to keep track of all incoming and outgoing pallets in real time. When an employee books 10 pallets on a specific customer, the app transaction is registered on the customer's account within a few seconds.

myPallet manages all types of transport packaging

Our solution helps you manage all types of transport packaging - eg. pallets, pallet frames, plastic tubs and meat boxes. It's also possible to manage your own special transport packaging with myPallet

To ensure a user-friendly experience in the myPallet app, we can customize it to your specific needs.

Real-time overview in the web portal

When an employee makes a transaction in the app, it becomes visible in the web portal within a few seconds.

Here, the person responsible for the administration can view all balances and transactions in real time. The web portal gives you a precise overview and in case of discrepancies these can quickly be solved to the satisfaction of both parties.

Reduce administration significantly

By replacing pen and paper with our digital tools, you can reduce the time spent on administration up to 98%.

Save time and money...

- » avoid paper forms
- » no archiving of documents
- » quick discovery/settlement of any dispute
